```javascript
// Import the Express.js library const

express = require('express');

// Create an Express application

const app = express(); const

port = 3000;

// Define a route for the root URL ("/")

app.get('/', (req, res) => {

res.send('Hello, this is the main page!');

});

// Define a route for "/hello"

app.get('/hello', (req, res) => {

res.send('Hello, world!');

});

// Start the server app.listen(port, () => {

console.log(`Server is running on http://localhost:${port}`);

});
```

PS C:\Users\Imman\Downloads> node expressex.js
Server is running on http://localhost:3000

Hello, this is the root route!

Hello, Express!
